NEW Model 4710

Remote Site Monitor

Monitor depth around fixed structures over extended periods. Records data at preset intervals for later retrieval using a USB thumb drive or via a wireless connection.

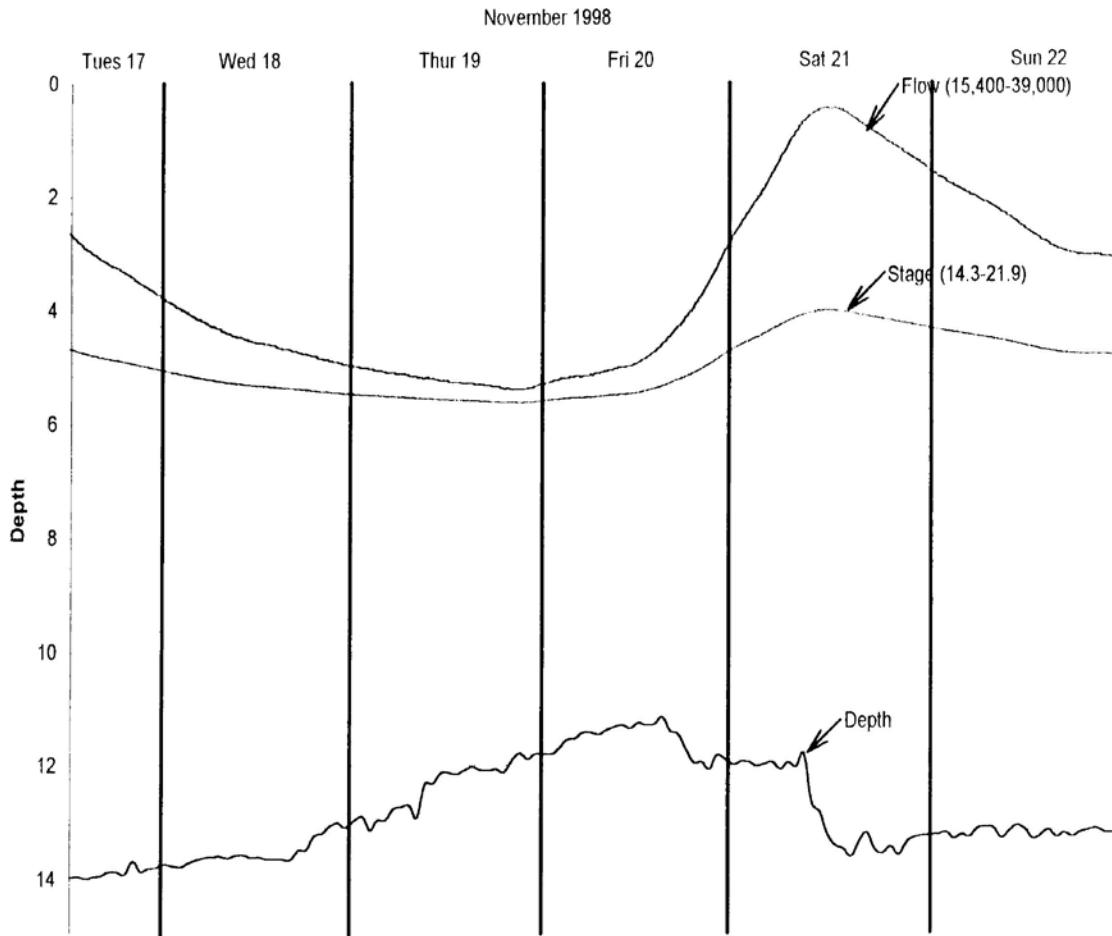

- Monitor scouring during high water flows
- Warning alarm at user specified depth of scour
- Rugged waterproof NEMA 4 enclosure for exterior mounting
- Optional wireless data link for receiving data and alarms on office PC or I-phone.
- Ethernet port for network interfacing
- Uses low current 12vdc power for remote site operation
- 1-4 channel capability standard
- Uses Ross "Smart Sounder" technology

Systems starting under \$10,000.00
